OVERVIEW

On November 18, 1999, the U.S. International Trade Commission (the Commission) instituted investigation No. 1205-5, Proposed Modifications to the Harmonized Tariff Schedule of the United States,¹ pursuant to section 1205 of the Omnibus Trade and Competitiveness Act of 1988. The Commission's most recent prior investigation of this issue was Investigation No. 1205-4, Proposed Modifications to the Harmonized Tariff Schedule of the United States Concerning the Tariff Treatment of Petroleum Jelly (Publication 2833, December 1994). Section 1205 requires the Commission to keep the Harmonized Tariff Schedule of the United States (HTS) under continuous review and to recommend to the President modifications to the HTS in order to reflect amendments to the Harmonized Commodity Description and Coding System (the Harmonized System or HS) that are periodically recommended by the World Customs Organization (WCO), (formally named the Customs Cooperation Council (CCC)), for adoption, and as other circumstances warrant. In addition to changes in the HS nomenclature, the Commission may take into account decisions issued by the WCO's Harmonized System Committee (HSC) affecting the classification of particular goods, where modifications to the HTS may be required in order to ensure that the subject imported goods continue to receive existing duty treatment. Also, the U.S. Customs Service may bring to the Commission's attention those changes in the classification of particular goods that may likewise require the creation of separate tariff categories in order to continue existing duty treatment. The modifications proposed in this report would implement in U.S. law the amendments to the Harmonized System nomenclature that were recommended for adoption by the WCO in July 1999, to become effective as of January 2002, and certain HSC decisions that are necessary and appropriate to ensure uniform application of the nomenclature.

¹See appendix A for a copy of the notice of institution of the investigation.

In accordance with section 1205, the Commission solicited, and gave consideration to, the views of interested Federal agencies and the public before proposing recommended modifications to the HTS. The Commission's report to the President presents its recommendations, summarizes the information on which its recommendations are based, presents a concordance of present and proposed tariff categories, and provides a statement of the probable economic effects of recommended changes on any industry in the United States. A copy of all written comments received from Federal agencies and a copy of a Commission-prepared summary of the views of other interested parties are also included.

Notice of this investigation was published in the *Federal Register* on November 29, 1999 (64 FR 66644), and made reference to a draft of proposed modifications, which was made available for the purpose of soliciting public comment by placing a copy on the Commission's Internet site and in the public docket for the investigation. The information contained in this report was obtained from or based upon (a) documents of the WCO, (b) research by the Commission's staff, (c) the Commission's files, (d) consultations with and communications from Government agencies, (e) written submissions of interested parties, and (f) other sources. The report contains background information on the HS and on the procedures involved in its modification, a discussion of proposed modifications requested by Customs, an annex presenting all of the proposed HTS modifications, a copy of the notice of investigation, a cross-reference table, and an appendix concerning submissions.

This document is a preliminary version of the Commission's final report based upon information obtained as of the date of issuance. As further information may be developed, particularly during the course of discussions at the World Trade Organization in connection with the modification of schedules of concessions, it may be necessary to reconsider the derivation of specified tariff rates and possibly to address other issues under negotiation. Accordingly, the Commission's investigation will remain open as necessary to address any such matters in order to complete the record.

RECOMMENDATIONS

BACKGROUND

The Harmonized System Convention

Subtitle B of title I of the Omnibus Trade and Competitiveness Act of 1988 (the 1988 Act) approved the United States' accession to the International Convention on the Harmonized Commodity Description and Coding System, which was completed in Brussels on June 14, 1983, under the auspices of the CCC. The Convention establishes a standardized tariff nomenclature,² the purpose of which is to facilitate international trade through the use of a single nomenclature structure for the description, classification, and coding of imports and exports of the contracting parties. This nomenclature, under the requirements of the Convention, assists in the collection, comparison, and analysis of international trade statistics. Article 3 of the HS Convention requires each contracting party to apply the HS nomenclature as the basis of its customs tariff nomenclature and the publication of foreign trade statistics.

The HS Convention created the HSC, composed of representatives of the contracting parties. Among its functions is the preparation of recommendations for achieving uniform interpretation of the HS nomenclature by the members and for keeping the HS product categories current, taking into account technological developments and varying patterns of international trade. These recommendations are issued as proposed amendments to the Convention, especially to the HS annex, or to one or more of the WCO's other publications. Notable among these are the Explanatory Notes to the HS and the Compendium of Classification Opinions, on which the contracting parties rely for guidance in the understanding of the nomenclature. While these two publications are helpful and authoritative sources of such information, they are not legally binding on the contracting parties.

²The annex to the HS Convention contains the HS nomenclature and legal rules and notes. The 1988 Act implemented the HTS, which contains the annex's HS provisions.

The recommended amendments to the HS generally arise in two contexts: from the HSC's actions on classification questions or disputes initiated by members, and from the work of a Review Subcommittee (RSC), as its recommendations are subsequently approved by the HSC and by the WCO. The latter body was established in 1990 by the HSC to review the HS nomenclature on a regular basis and to consider possible changes needed to keep it up to date. Most of the amendments set forth in the WCO's Article 16³ recommendation and under consideration in this investigation comprise RSC proposals that resulted from its most recent review cycle.

Pursuant to Article 16, amendments to the HS that have been recommended to members by the WCO are deemed to be accepted 6 months after the date of notification of the recommendation, except with respect to contracting parties that notify the WCO of an objection. By agreement of the members, any amendments to the Explanatory Notes or to the Compendium of Classification Opinions are deemed to be accepted when no objection is notified within 3 months of HSC approval.

Executive Authority

Under sections 1205 and 1206 of the 1988 Act, an administrative mechanism exists to allow the President to proclaim certain types of modifications to the HTS, including changes needed to bring the HTS into conformity with proposed amendments of the HS nomenclature. The Commission is directed by section 1205(a) to keep the HTS under continuous review and to recommend appropriate modifications to the President whenever amendments to the HS nomenclature are adopted by the WCO and as warranted by particular circumstances:

³Article 16 sets out the procedures for amending the Convention and its HS annex, including provisions for contracting parties to notify the WCO Secretary General of objections to any recommended amendment. See WCO Document 99NL664-Wi/Gon of July 1, 1999.

[The Commission] shall recommend to the President such modifications in the Harmonized Tariff Schedule as [it] considers necessary or appropriate—

- (1) to conform the [HTS] with amendments made to the Convention;⁴
- (2) to promote the uniform application of the Convention and particularly the Annex thereto;
- (3) to ensure that the HTS is kept up-to-date in light of changes in technology or changes in patterns of international trade;
- (4) to alleviate unnecessary administrative burdens; and
- (5) to make technical rectifications.⁵

Section 1205(d) provides that the Commission cannot recommend a modification to the HTS unless the change (1) is ‘consistent with the Harmonized System Convention or any amendment thereto recommended for adoption;’ (2) is ‘consistent with sound nomenclature principles;’ and (3) ‘ensures substantial rate neutrality.’ Any modification that would change a rate of duty must be consequent to, or necessitated by, recommended nomenclature changes. Last, the recommended modifications ‘must not alter existing conditions of competition for the affected U.S. industry, labor, or trade.’

Section 1206 of the 1988 Act authorized the President to proclaim modifications to the HTS, on the basis of recommendations by the Commission under section 1205, if he determines that the proposed changes are in conformity with U.S. obligations under the HS Convention and do not run counter to the national economic interest of the United States. The modifications can be proclaimed only after the

⁴Under the terms of article 2 of the HS Convention, the nomenclature annex is a part of the Convention, and a reference to the Convention is deemed to include a reference to the annex.

⁵Section 1202(6) of the 1988 Act limits the scope of “technical corrections” to include clerical or typographical errors that do not affect the substance or meaning of the text, such as errors in spelling, numbering, punctuation, or indentation and also to inadvertent errors (including inadvertent omissions) in cross-references between headings, subheadings, or notes, as well as to similar errors.

expiration of a 60-day period⁶ that begins on the date the President submits a report to the Committee on Ways and Means of the House of Representatives and to the Committee on Finance of the Senate; the report must enumerate the proposed modifications and the reasons for making them. Such proclaimed modifications cannot become effective before the 15th day after the text of the implementing proclamation is published in the *Federal Register*.

PROPOSED MODIFICATIONS

A draft of the Commission's proposed modifications was made available to the public in a document placed on the Commission's Internet site as announced in the notice of institution of the investigation. The proposed modifications presented in appendix B to this report and summarized below incorporate revisions made as a result of written comments submitted to the Commission and of any corrections or technical changes deemed necessary (including changes resulting from documents issued by the WCO). Correlation tables between existing and proposed text appear at appendixes C and D. Copies of written comments from Government agencies, including those from Customs, are reproduced in appendix E; summaries of written views of nongovernment interested parties are included in appendix F.

The bulk of the recommendations in appendix B are based upon decisions taken by the HSC during its 12th through 23rd sessions (October 1993 through May 1999), following various actions of the RSC submitting its proposals as they were finalized. As noted above, the Article 16 recommendation was issued on July 1, 1999, and contains approximately 200 changes that are intended to update the nomenclature or clarify the classification of particular goods. For example, existing heading 6002 (which covers most knitted or crocheted fabrics) will be replaced by 5 headings covering these goods in greater detail; in another case, several changes will be made in the headings covering paper and paper products. Other

changes in the Article 16 recommendation require no corresponding changes in the HTS, because the proposals either relate to the French text only or do not require the establishment of additional tariff rate lines to continue existing duty treatment. In addition, as discussed in the paragraphs set forth below, a few changes contained in appendix B result from formal or informal requests from the United States Customs Service.

Modifications to bring the HTS into conformity with amendments to the HS Nomenclature: bitter limes

At its 22nd Session, the HSC decided to classify Persian, Tahiti and Bearrs limes in subheading 0805.90 because they all belong to the species *Citrus latifolia*, and therefore are not covered by the taxonomic classification *C. Aurantifolia* specified in HS subheading 0805.30. The HSC subsequently decided to amend the legal texts to include the term *C. latifolia* in the text to subheading 0805.30 so as to group all bitter or acid limes in that one subheading. The Commission understands that the Customs Service currently classifies Persian, Tahiti and Bearrs limes in that subheading (0805.30) because it does not consider *C. latifolia* to be a species distinct from *C. Aurantifolia*. Therefore, the current draft shows the textual amendment by adding *C. latifolia* to the description in subheading 0805.30, but no consequential change of duty rate or of product coverage is indicated in the rate tables or cross-reference table.

*Modifications to bring U.S. Customs practice into conformity with
HSC decisions not affecting the international HS Nomenclature*

Water chestnuts

In a letter dated November 24, 1998,⁷ the U.S. Customs Service requested changes to the HTS to reflect a decision by the 12th Session of the HSC to classify fresh Chinese water chestnuts in HS heading 0714 (tuber and root plants with high starch content). Customs notified the Commission that it was currently classifying such products in heading 0709 (other vegetables) and provided classification information for Chinese water chestnuts imported in forms or conditions other than fresh. Although the HSC has taken no action to amend the HS Convention in this regard, Customs is of the opinion that circumstances warrant modifications to the HTS to promote the uniform application of the Harmonized System Convention.

Polarimetric test for sugar duty

In a letter dated October 27, 1995,⁸ Customs requested that the Commission recommend a modification to additional U.S. note 1 to chapter 17 of the HTS to change the analytical test methodology by which polarimetric readings of sugar are accomplished. Under the current provisions of that note, the duty and quota levels for certain raw or refined sugars are based on the polarimetric reading of the product. The above-mentioned note specifies that the procedure recognized by the International Commission for Uniform Methods of Sugar Analysis (ICUMSA) is to be used in determining polarimetric readings. However, the only method officially recognized by the ICUMSA is very old and involves the use of basic lead acetate, which exposes Customs officials to hazardous chemicals that must be disposed of after use. According to Customs, the trade has abandoned the use of that methodology in favor of alternate methods that do not involve the use of hazardous materials. ICUMSA has discussed a possible new standard for

⁷See Customs' submission in appendix E.

⁸See Customs' submission in appendix E.

several years but has not agreed to date on a single standard. Customs requested that the HTS be modified so as to not specify a particular method. The Commission has included this proposal in the current document because elimination of the ICUMSA standard from the current additional U.S. note will bring Customs' practice into conformity with the sugar analytical methodology prevalent in international transactions. Customs has informed the Commission informally that several studies undertaken by Customs laboratories have indicated that any differences between polarimetric tests using lead and those not using lead are attributable to the influence of non-sugars in the raw sugar samples. Customs further advises that the resulting differences are too small to impact revenue collection or quantities for quota purposes.

Sugarless cough drops

In a letter dated February 26, 1999,⁹ Patrick D. Gill of Rode & Qualey, representing Warner-Lambert Company, requested that the Commission recommend that sugarless cough drops be provided for in heading 2106 (edible preparations not elsewhere specified or included), at the duty rate corresponding to the current rate for cough drops already falling in heading 2106 (edible preparations not elsewhere specified or included). In Investigation 1205-3, the Commission had proposed amendments to chapter 17 to reflect a decision taken by the HSC to classify several samples of sugar-sweetened cough drops containing menthol in heading 1704; this proposal was implemented in the HTS effective January 1, 1996. Warner-Lambert requested that the Commission propose modifying HTS heading 2106 to provide for sugarless cough drops at the same rate of duty (for sugar-sweetened cough drops) that had been transferred from heading 3004 to subheading 1704.90.25 in 1996. Although the HSC has not ruled on the classification of sugarless cough drops, it seems reasonable to provide a classification for such products that would parallel the HSC's classification for sugar-sweetened cough drops; artificially sweetened

⁹See letter in appendix F.

versions of confectionery of chapter 17 are generally classified in heading 2106, so the current proposal would provide for the sugarless cough drops in heading 2106.

Bicycle derailleur cable casings

In a letter dated September 21, 1995,¹⁰ and subsequent informal communications, Customs notified the Commission that present HTS subheading 3917.32.20 reflected an incorrect classification for tubular, plastics casings for bicycle derailleur cables. The reasoning given was that note 8 to chapter 39 limits the scope of heading 3917 to tubes, pipes and hoses “of a kind generally used for conveying, conducting or distributing gases or liquids.” Because derailleur cable casings are not goods of a kind used for these purposes, Customs indicated that these casings are more properly classified in heading 3926. It was therefore proposed that the legal provisions and rates of duty for these cable casings be transferred from heading 3917 to heading 3926.

End-worked flooring strips

At its 17th and 18th sessions, the HSC decided that flooring strips worked at the ends to have a tongue and groove configuration are classified in heading 4409. Customs currently classifies such products in heading 4418 (builders’ joinery and carpentry). Although the HSC has taken no action to amend the HS Convention in this regard, Customs has informed the Commission informally that circumstances warrant modifications to the HTS to promote the uniform application of the HS Convention.

PVD Apparatus

In a letter dated August 11, 1998,¹¹ Customs requested that the Commission recommend that the HTS be modified to reflect the decision by the HSC to classify physical vapor deposition (PVD) apparatus in heading 8543 of the Harmonized System. The Customs request indicates that “physical deposition apparatus for semiconductor production” had been covered under the Ministerial Declaration on Trade in

¹⁰See Customs’ letter in appendix E.

¹¹See Customs’ letter in appendix E.

Information Technology Products (known informally as the Information Technology Agreement or ITA) (December 13, 1996). At that time, the United States notified participants in the ITA that it classified physical deposition apparatus in subheading 8479.89. Consequently, the decision of the HSC to classify PVD apparatus in heading 8543 represents and necessitates a change of classification on the part of the United States. Although the HSC has made no recommendation to amend the Convention in this regard, Customs is of the opinion that circumstances warrant modifications to the HTS to promote the uniform application of the HS Convention.

Paging Alert Devices

In a letter dated August 12, 1998,¹² Customs requested that the Commission recommend modifications to the HTS to reflect the HSC decision to classify various types of radio pagers in heading 8527. The HTS currently provides for “paging alert devices” in subheading 8531.80.40, a provision created by the United States to implement a rule of origin pursuant to Annex 401 of the North American Free Trade Agreement (NAFTA). This tariff category is interpreted by Customs as covering one type or class of radio pagers, specifically simple pagers that signal the user of some event (e.g., telephone call). Consequently, the decision of the HSC to classify radio pagers in heading 8527 represents and necessitates a change of classification for the United States. Customs has examined the legal basis for the HSC’s decision on radio pagers and believes that the decision to classify “paging alert devices” in heading 8527 cannot be implemented administratively. Customs has indicated its belief that the principal function of these pagers is to signal the user, so that application of note 3 to section XVI of the HS directs classification of these pagers in heading 8531. Therefore, Customs believes that, to promote the uniform application of the HS Convention, circumstances warrant modifications to the HTS to reflect the transfer of “paging alert devices” from heading 8531 to heading 8527.

¹²See Customs’ letter in appendix E.

PROBABLE ECONOMIC EFFECTS OF PROPOSED MODIFICATIONS

The Commission considers the proposed modifications to be appropriate to provide for the goods concerned under the proper HS headings or subheadings without altering existing Customs tariff treatment. Furthermore, the modifications would not alter existing conditions of competition for the affected U.S. industries, labor, or trade. Consequently, the information collected by the Commission indicates that these modifications, if proclaimed, would ensure substantial rate neutrality and would have no significant economic effect on U.S. industry or labor.

INTERNATIONAL TRADE COMMISSION

[Investigation 1205-5]

Proposed Modifications to the Harmonized Tariff Schedule of the United States

AGENCY: United States International Trade Commission

ACTION: Institution of investigation

EFFECTIVE DATE: November 18, 1999

SUMMARY: On November 18, 1999, the Commission instituted investigation No 1205-5, Proposed Modifications to the Harmonized Tariff Schedule of the United States, pursuant to section 1205 of the Omnibus Trade and Competitiveness Act of 1988. Section 1205 directs the Commission to keep the Harmonized Tariff Schedule of the United States (HTS) under continuous review and to recommend modifications to the HTS (1) when amendments to the International Convention on the Harmonized Commodity Description and Coding System (Harmonized System), and the Protocol thereto, are recommended by the World Customs Organization (WCO) (formerly known as the Customs Cooperation Council) for adoption, and (2) as other circumstances warrant. The Commission's report will set forth the proposed changes and indicate the necessary changes in the HTS that would be needed to conform the HTS to the international nomenclature structure; the report will also include other appropriate explanatory information on the proposed changes.

FOR FURTHER INFORMATION CONTACT:
Eugene A. Rosengarden, Director (202-

205-2592), Office of Tariff Affairs and Trade Agreements, U S International Trade Commission, Washington, DC, 20436. Hearing impaired individuals are advised that information on this investigation can be obtained by contacting the TDD terminal on (202) 205-1810.

Background

The majority of the proposed changes included in this investigation are the result of the work of the WCO and its Harmonized System Committee (HSC) to update and clarify the Harmonized System nomenclature, as part of the WCO's long-term program to review the nomenclature structure on a formal basis. The WCO has recommended the adoption of certain modifications to the nomenclature of the international Harmonized System, in accordance with Article 16 of the Harmonized System Convention, to become effective in January, 2002. The changes proposed to conform the HTS with the WCO's recommendations, and to reflect in the HTS certain other decisions taken by the HSC, will be made available in the Office of the Secretary, Room 112, United States International Trade Commission, 500 E Street SW, Washington, DC 20436 (telephone 202-205-2000), and will also be posted on the Commission's web site at the address indicated below. These changes encompass all decisions taken by the HSC since the implementation of the last set of WCO modifications to the Harmonized System on January 1, 1996, as well as proposed actions subject to further consideration by the HSC during its sessions in 2000. Future notices will be issued in this investigation indicating the final resolution of all matters and decisions taken by the HSC during the course of Commission consideration.

Other proposed changes included in this investigation are requested by the U S Customs Service, in order to clarify the proper tariff classification and duty treatment of particular goods (due to decisions of the Court of International Trade, the HSC, or the Customs Service). These changes will be treated separately by the Commission both during the investigation and in the Commission's report.

The Commission will prepare a non-authoritative cross-reference table to provide guidance to potentially affected parties and to show the likely existing and future tariff classifications of the goods concerned. The Customs Service has domestic legal authority for tariff classification and may provide information, both during the course of the investigation and after the Commission's report is submitted, that

indicates different or additional tariff classifications of some goods. Moreover, the WCO will eventually issue a cross-reference table under Article 16 of the Harmonized System Convention indicating the agreed international classifications (existing and future) of the goods affected by the proposed changes. The latter table may be released later in the Commission's investigation, and differences between the international and domestic classification of a few goods may be suggested (in some cases due to reservations filed by member countries or to theoretical or asserted classifications for some goods). Thus, the classifications shown in the Commission's cross-reference table are subject to change during the study.

Written Submissions

Interested parties are invited to submit written statements concerning the matters being addressed by the Commission in its report on this investigation. Commercial or financial information that a submitter desires to treat as confidential must be submitted on separate sheets of paper, each clearly marked "Confidential Business Information" at the top. All submissions requesting confidential treatment must conform with the requirements of § 201.6 of the Commission's rules of practice and procedure (19 CFR 201.6). All written submissions, except for confidential business information, will be made available in the Office of the Secretary of the Commission for inspection by interested parties. To be assured of consideration by the Commission, written statements relating to the Commission's report should be submitted to the Commission at the earliest practical date and should be received no later than the close of business on December 17, 1999. All submissions should be addressed to the Secretary, United States International Trade Commission, 500 E Street SW, Washington, DC 20436. The Commission's rules do not authorize filing submissions with the Secretary by facsimile or by electronic means.

Persons with mobility impairments who will need special assistance in gaining access to the Commission should contact the Office of the Secretary at 202-205-2000. General information concerning the Commission may also be obtained by accessing its Internet server (<http://www.usitc.gov>).

¹The French version of the HS Convention distinguishes between kitchen sinks (“évier”), which are not specifically named in the French text of subheading 3922.10, and bathroom sinks (“lavabos”); the English text, on the other hand, refers to “washbasins”, which seems to cover both. Thus in the French text, kitchen sinks would seem to fall in subheading 3922.90, whereas in the English version, kitchen sinks would appear to be covered by 3922.10. The amendment to 3922.10 to include a reference to “sinks” (“évier” in the French) led the WCO to reflects a transfer of goods, at least in the French version, of kitchen sinks from subheading 3922.90 to subheading 3922.10. As a practical matter, there is little or no such transfer in the US tariff.

¹³The French version of the HS Convention distinguishes between kitchen sinks (“évier”), which are not specifically named in the French text of subheading 3922.10, and bathroom sinks (“lavabos”); the English text, on the other hand, refers to “washbasins”, which seems to cover both. Thus in the French text, kitchen sinks would seem to fall in subheading 3922.90, whereas in the English version, kitchen sinks would appear to be covered by 3922.10. The amendment to 3922.10 to include a reference to “sinks” (“évier” in the French) led the WCO to reflects a transfer of goods, at least in the French version, of kitchen sinks from subheading 3922.90 to subheading 3922.10. As a practical matter, there is little or no such transfer in the US tariff.

Eugene A Rosengarden, Director
Office of Tariff Affairs and Trade Agreements
U S International Trade Commission
500 E Street, S W
Washington, D C 20436

Dear Mr. Rosengarden

The purpose of this letter is to request that the U S International Trade Commission consider exercising its authority under section 1205 of the Omnibus Trade and Competitiveness Act of 1988 (Public Law 100-418) (19 U S C § 3005) to recommend to the President changes to the Harmonized Tariff Schedule of the United States as concerns the classification of certain water chestnuts. These changes are intended to bring the HTSUS into conformity with a decision by the Harmonized System Committee (HSC) of the World Customs Organization.

By way of background, at its October 1993 session, the HSC examined the classification of two types of water chestnuts. The first type of water chestnut examined by the HSC was an edible nut-like spiny angled fruit of a plant of the genus *Trapa* (and species *Trapa natans*). The HSC unanimously agreed to classify this type of water chestnut in heading 0802 as a nut. (See annex E/4 to WCO document 38 270 (HSC/12-Report)--copy attached). The second type of water chestnut examined by the HSC was an edible tuber of Chinese sedge (of the species *Eleocharis dulcis* or *Eleocharis tuberosa*) which is commonly known as the "Chinese water chestnut." The HSC decided by 9 to 6 votes to classify this type of water chestnut in heading 0714 as a tuber. (See annex E/4 to WCO document 38 270 (HSC/12-Report))

At its April 1994 session, the HSC adopted amendments to the Explanatory Notes to the Harmonized System to reflect its decisions on the classification of the above-mentioned two products. (See annexes F/4 and L/9 to WCO document 38 760 (HSC/13-Report)--copy attached)

The U S Customs Service has classified fresh Chinese water chestnuts in heading 0709 (and specifically in subheading 0709 90 90 of the HTSUS) as a vegetable. Although we continue to believe that the product is properly classified in heading 0709 as a vegetable, in the interest of uniformity of application of the Harmonized System, we would like to be able to classify fresh

Chinese water chestnuts in heading 0714 as a tuber in accordance with the HSC's above-mentioned decision. The reclassification of fresh Chinese water chestnuts from heading 0709 to heading 0714, however, will result in the consequential reclassification of certain related products in the HTSUS. That is, there will also be a reclassification of Chinese water chestnuts when imported in other than in a fresh condition. Three of the eight-digit provisions in which the product is currently classified when imported in other than in a fresh condition specifically mention water chestnuts by name 0710 80 10 (frozen water chestnuts), 0710 90 10 (mixtures of vegetables mixtures of pea pods and water chestnuts) and 2005 90 40 (other prepared or preserved water chestnuts). These three provisions would no longer be proper subheadings for classification of Chinese water chestnuts if the product is reclassified in heading 0714 when presented in a fresh condition. Therefore, we request that those three subheadings be modified to bring them into conformity with the above-mentioned decision of the HSC. Of course, other modifications may also be necessary.

For your information and review, we believe that the HSC's decision to classify fresh Chinese water chestnuts in heading 0714 would result in the product being classified in the HTSUS as follows

- fresh or chilled 0714 90 40
- frozen 0714 90 45
- dried, in pellet form 0714 90 50
- dried, not in flour, meal, or powder form 0714 90 60
- dried and in the form of flour, meal, or powder 1106 20 00
- prepared or preserved by acetic acid 2001 90 60
- prepared or preserved other than as described above 2008 99 90

Please let us know if you have any questions. We look forward to working with you on this matter.

Sincerely,

Mr. Eugene Rosengarden, Director
Office of Tariff Affairs & Trade Agreements
U.S. International Trade Commission
500 E St. S.W.
Washington, D.C. 20436

Dear Mr. Rosengarden:

We wish to bring to your attention a request for modification of the language used in Additional U.S. Note 1, Chapter 17, HTSUS. The referenced U.S. Note text should be amended to reflect technological progress in the field of analysis of raw sugar and to allow our office to select an alternate analytical method which does not require the use of basic lead acetate, an extremely toxic chemical, in its analytical procedure. The reasons behind this request are further discussed below.

BACKGROUND

Raw sugar, heading 17.01, is sold on the basis of its sucrose content as measured by polarimetric methods. Customs laboratories regularly analyze raw sugar to determine the sucrose content by weight for duty purposes. Customs laboratory reports are also used by Trade Compliance, Quota Branch, to correct the sugar quota amounts allocated per country and per quota period. These reports contain the degree of polarization and quota weights (raw values) for all raw sugar shipments imported into the United States.

Additional U.S. Note 1, Chapter 17, requires that this office analyzes raw sugar samples using an official method of analysis developed by the International Commission for Uniform Methods of Sugar Analysis.

The referenced Additional U.S. Note states:

"The term 'degree' as used in the 'Rates of Duty' columns of this chapter means International Sugar Degree as determined by polarimetric test performed in accordance with procedures recognized by the International Commission for Uniform Methods of Sugar Analysis (ICUMSA)."

Since the adoption of the Harmonized System, the polarization of raw sugar has been determined by Customs using the ICUMSA method in accordance with this U.S. Note. However, there are some problems related to this method that require further attention.

Basic Lead Acetate

The ICUMSA method uses basic lead acetate (a.k.a. lead subacetate, CAS No. 1335-32-6) as a clarifying agent. This chemical is considered a suspected carcinogen and a very toxic material. Due to the high number of raw sugar samples processed in our laboratories, a significant quantity of lead subacetate waste is produced. The waste generated from the analysis is also considered a toxic waste, and must be properly disposed of in accordance with state and federal regulations. We note that there are other chemicals that could act as clarifying agents as well as lead subacetate, unfortunately, the ICUMSA method does not allow the use of other clarifying agents.

New Instrumentation

The ICUMSA lead subacetate method uses a conventional polarimeter that is calibrated in international sugar degrees at 20°C. In order to circumvent the use of lead subacetate, the U.S. sugar industry has developed and adopted a polarization method that does not need clarification. The new method employs a near infrared (NIR) polarimeter rather than a conventional polarimeter and is currently used for all commercial settlements and payments for raw sugar in the United States. We note that the NIR method is currently under evaluation by ICUMSA and U.S. Customs, and has been shown to be as accurate as the ICUMSA method. However, the revision and adoption of any new method by recognized standards organization, such as, ICUMSA, is a slow process that may take several years.

Currently, Customs laboratories are allowed by local and state authorities to generate the lead subacetate hazardous waste although under increasingly stringent controls. It is only a matter of a short time before we will not be allowed to generate the waste at all or the expense will be prohibitive. Therefore, it is imperative that we proceed without delay with changing the U.S. Note to allow for the use of an alternative method.

We recommend that the following text which had appeared in the old Tariff Schedule of the United States be used to replace the current text:

"The term 'degree' as used in the 'Rates of Duty' columns of this chapter means sugar degree as determined by a polarimetric test."

Mr Eugene A Rosengarden
United States International Trade Commission

Dear Mr Rosengarden

This letter is pursuant to Section 1205 of the Omnibus Trade and Competitiveness Act of 1988. Section 1205 states that the International Trade Commission shall keep the Harmonized Tariff Schedule of the United States (HTSUS) under continuous review and, as circumstances warrant, shall recommend to the President such modifications in the HTSUS as the Commission considers necessary or appropriate. The purpose of this letter is to bring to your attention a matter which we believe may warrant the exercise of this authority.

Heading 3917, HTSUS, provides for tubes, pipes and hoses and fittings therefor, of plastics. Chapter 39, Legal Note 8, HTSUS, defines the expression "tubes, pipes and hoses" to mean hollow products of a kind generally used for conveying, conducting or distributing gases or liquids. The Note further specifies that the expression includes sausage casings and other lay-flat tubing. The term "lay-flat tubing" refers to tubing which is not capable of supporting a tubular shape, such as sausage casings.

Presidential Proclamation 6763, implementing the Uruguay Round of multilateral trade negotiations, resulted in a new eight-digit breakout under heading 3917, HTSUS. Specifically, subheading 3917 32 20, extends duty-free treatment to casing for bicycle derailleur cables and casing for cable or inner wire for caliper and cantilever brakes.

The application of sound nomenclature principles mandates that classification in a subheading can be considered only after classification in a four-digit heading has been decided. By its terms, heading 3917 provides generally for tubes, pipes and hoses. However, Chapter 39, Note 8, evidences an intent to limit the scope of the heading. Our product specialists in this area are of the opinion that the casings identified in subheading 3917 32 20 are not of a kind generally used for conveying, conducting or distributing gases or liquids, nor are they lay-flat tubing. In our judgment, the casings at issue are beyond the scope of heading 3917. Therefore, as a matter of legal interpretation, subheading 3917.32.20 appears to be an empty provision. As a practical matter we are not aware of any pending entries concerning these goods.

In view of the foregoing, we request that the Commission consider such modifications as are necessary or appropriate to conform the Uruguay Round commitments concerning the subject merchandise to the structure of the HTSUS. It is noted that Customs has classified certain protective casing, when imported in material lengths or cut to length, in subheading 3926 90 9890. See Headquarters Ruling Letter (HRL) 082619, dated February 26, 1990, HRL 082700, dated February 15, 1990, HRL 084168, dated July 14, 1989. However, we have an informal practice of classifying the instant wire and cable casing, when cut to length with fittings, as parts of bicycles pursuant to subheading 8714 99, HTSUS.

Your attention to this matter is appreciated

Sincerely,

John A. Durant, Director

Mr Eugene A Rosengarden, Director
Office of Tariff Affairs and Trade Agreements
United States International Trade Commission
500 E Street, S W
Washington, D C 20436

Dear Mr Rosengarden

The purpose of this letter is to direct your attention to a decision by the Harmonized System Committee (HSC) which may warrant modifications to the Harmonized Tariff Schedule of the United States (HTSUS)

The HSC decision in question concerned the classification of Physical Vapor Deposition (PVD) Equipment. PVD equipment is machinery used for coating silicon wafers. The equipment consists of stations or modules which are interconnected. Initially, a wafer is placed in a sputter etch chamber where its surface is prepared to receive a series of layered depositions. After surface preparation, the wafer is transported and positioned in a vacuum chamber. In the chamber, gas ions are accelerated by an electrical field. The accelerated ions bombard a target disk, which contains a high purity metal. The ions strike the target and cause uncharged atoms of metal to be dislodged. The dislodged metal atoms are "sputtered" or deposited over the wafer to form a thin film or coating of conductive materials. The coated silicon wafer is used in the manufacture of semiconductor chips for integrated circuits.

The issue presented for consideration by the HSC was whether the equipment is classified as mechanical apparatus of Chapter 84, or electrical apparatus of Chapter 85. The United States position is fully set forth in a U.S. Note which was published in Doc 41 312 (copy attached). At its 15th session, the Harmonized System Committee agreed with the U.S. that the PVD equipment is classified as mechanical apparatus of subheading 8479.89, by 13 votes to 11. (See Annex II/15 to Doc 39 400)

Subsequently, the European Communities (EC) filed a reservation against the Committee's decision. At its 18th Session, the Committee decided that the equipment is classified in heading 85 43, by 15 votes to 11. (See Annex H/16 to Doc 40 600) Following a reservation filed by the United States, the Committee re-examined the issue at its 21st Session. At that time, the Committee confirmed its decision to classify the apparatus in heading 85 43, by 27 votes to 9. (See Annex H/11 to Doc 42 100)

It should be noted that "physical deposition apparatus for semiconductor production" and "parts of apparatus for physical deposition by sputtering on semiconductor wafers" were covered

under the Ministerial Declaration on Trade in Information Technology Products (ITA) (December 13, 1996) At that time, the United States notified the participants to the Agreement that it classified physical deposition apparatus in subheading 8479 89, and parts of the apparatus in subheading 8479 90 (copy attached) A statistical annotation was created for the apparatus in subheading 8479 89 8578, HTSUS The parts are provided for in subheading 8479 90 93, HTSUS

In order for Customs classification to be consistent with the Committee's decision, we believe that it will be necessary to modify the HTSUS so as to specifically provide for PVD apparatus in subheading 8543 89, HTSUS, and for the parts in subheading 8543.90, HTSUS The U S Customs Service believes that the transfer of goods from Chapter 84 to Chapter 85 can be effected pursuant to the ITC's authority under § 1205 of the Omnibus Trade and Competitiveness Act of 1988 (19 U S C 3005) to recommend modifications to the HTSUS in order to promote the uniform application of the Harmonized System Convention Alternatively, there may be an independent basis for proposing modifications to the HTSUS under the ITA or by application of other legal instruments

The Customs Service respectfully requests that the ITC seek modifications to the HTSUS in order to promote the uniform application of the Harmonized System Convention

The Honorable Marcia Miller, Chairman
United States International Trade Commission
500 E Street, S W

Dear Chairman Miller

This letter is pursuant to Section 1205 of the Omnibus Trade and Competitiveness Act of 1988. As you are aware, Section 1205 (19 U S C § 3005) provides that the International Trade Commission (ITC) shall keep the Harmonized Tariff Schedule of the United States (HTSUS) under continuous review and, as circumstances warrant, shall recommend to the President such modifications in the HTSUS as the Commission considers necessary or appropriate. The purpose of this letter is to bring to your attention a matter which we believe may warrant the exercise of this authority.

Heading 85 31 of the HTSUS provides for certain "electric sound or visual signaling apparatus." Subheading 8531 80.40, HTSUS, provides specifically for "paging alert devices." This tariff item covers simple pagers which signal the user of some event (e.g., telephone call). It was created by the United States to implement a rule of origin pursuant to Annex 401 of the North American Free Trade Agreement (NAFTA). (See attached.) These devices are also covered by the Information Technology Agreement. (See attached.) Until recently, the United States believed that the tariff item for paging alert devices covers pagers which both signal the user and display information on a liquid crystal display (e.g., telephone numbers, stock quotations). However, it is clear that the expression "paging alert devices" does not cover more sophisticated pagers which possess additional capabilities, such as the ability to facilitate two-way communication or to record messages.

At the time the NAFTA was negotiated, the Canadian and Mexican Administrations classified all pagers, including paging alert devices, as radio reception apparatus of subheading 8527.90. Accordingly, in order to implement the corresponding NAFTA rule of origin for these goods in Canada and Mexico, a tariff item was created in subheading 8527.90 of their respective tariffs.

After the NAFTA was implemented, the classification of paging alert devices was identified as a difference between the NAFTA Parties. Pursuant to Article 513(6) of the NAFTA, the Parties attempted to resolve the difference in the NAFTA Customs Subgroup. However, they were unable to reach consensus on the classification of these products.

"Please visit the U S Customs Web at <http://www.customs.ustreas.gov>"

The classification of paging alert devices was referred to the Harmonized System Committee (HSC) for consideration at its 20th Session. The working documents for the issue (documents 41 322 and 41 567, copies attached) set forth the competing positions of the United States and Canada. The Harmonized System Committee was asked to classify both very simple pagers which are designed only to activate a sound or visual signal, as well as such pagers which can receive messages.

Applying Note 3 to Section XVI, the United States position was that the principal function of both types of pagers at issue is that of signaling. Conversely, the Canadian position was that the principal function is that of radio reception. In addition, Canada argued that paging alert devices should be classified in heading 85 27 because that is the heading which covers more sophisticated pagers, such as those which facilitate two-way communication or which are capable of storing messages. Ultimately, the Committee decided by wide margins that both types of pagers are classified as radio reception apparatus of subheading 8527.90. Two Classification Opinions were adopted at the Committee's 21st Session. (See attached copies)

The United States Customs Service has reviewed the legal basis for each of the Committee's decisions. We are persuaded that the Committee's decision on pagers which display information is correct because they convey information, rather than simply signal the user. For this reason, we are prepared to accept the Committee's decision that the principal function of these pagers is to receive radio transmissions.

U.S. Customs believes that the Committee's decision on pagers which are designed merely to signal the user can be implemented only if the HTSUS is modified so that it is clear that simple pagers are classified within heading 85.27. In our view, the Committee's decision on these pagers cannot be implemented administratively because the principal function of these pagers is to signal the user. The U.S. Customs Service believes that the transfer of paging alert devices from heading 85 27 to heading 85 31 would promote the uniform application of the Harmonized System Convention.

John A. Durant, Director

Re: Warner-Lambert Company Section 1205 Requests

Dear Mr. Rosengarden:

In letters dated April 15, 1998 and May 26, 1998, our client Warner Lambert Company made requests pursuant to Section 205 of the Omnibus Trade and Competitiveness Act of 1988 (19 U.S.C. § 3005) for a change in tariff treatment for two of its products; Halls® sugarless cough drops and Halls® Vitamin C drops. Copies of the letters are attached hereto.

We were advised by your office that the International Trade Commission is planning to combine a number of Section 1205 requests and commence an investigation shortly to cover all such requests. Warner-Lambert would like its Section 1205 requests to be included in this upcoming Commission investigation.

RODE & QUALEY

Warner-Lambert is prepared to supply any additional information needed in connection with the investigation. Kindly contact us if there are any questions concerning this request.

Very truly yours,

Patrick D. Gill

DEFINITIONS OF TARIFF AND TRADE AGREEMENT TERMS

Appendix G

TARIFF AND TRADE AGREEMENT TERMS

In the **Harmonized Tariff Schedule of the United States** (HTS), chapters 1 through 97 cover all goods in trade and incorporate in the tariff nomenclature the internationally adopted Harmonized Commodity Description and Coding System through the 6-digit level of product description. Subordinate 8-digit product subdivisions, either enacted by Congress or proclaimed by the President, allow more narrowly applicable duty rates; 10-digit administrative statistical reporting numbers provide data of national interest. Chapters 98 and 99 contain special U.S. classifications and temporary rate provisions, respectively. The HTS replaced the **Tariff Schedules of the United States** (TSUS) effective January 1, 1989.

Duty rates in the **general** subcolumn of HTS column 1 are normal trade relations rates, many of which have been eliminated or are being reduced as concessions resulting from the Uruguay Round of Multilateral Trade Negotiations. Column 1-general duty rates apply to all countries except those listed in HTS general note 3(b) (Afghanistan, Cuba, Laos, North Korea, and Vietnam) plus Serbia and Montenegro, which are subject to the statutory rates set forth in **column 2**. Specified goods from designated general-rate countries may be eligible for reduced rates of duty or for duty-free entry under one or more preferential tariff programs. Such tariff treatment is set forth in the **special** subcolumn of HTS rate of duty column 1 or in the general notes. If eligibility for special tariff rates is not claimed or established, goods are dutiable at column 1-general rates. The HTS does not enumerate those countries as to which a total or partial embargo has been declared.

The **Generalized System of Preferences** (GSP) affords nonreciprocal tariff preferences to developing countries to aid their economic development and to diversify and expand their production and exports. The U.S. GSP, enacted in title V of the Trade Act of 1974 for 10 years and extended several times thereafter, applies to merchandise imported on or after January 1, 1976 and before the close of September 30, 2001. Indicated by the symbol "A", "A*", or "A+" in the special subcolumn, the GSP provides duty-free entry to eligible articles the product of and imported directly from designated beneficiary developing countries, as set forth in general note 4 to the HTS.

The **Caribbean Basin Economic Recovery Act** (CBERA) affords nonreciprocal tariff preferences to developing countries in the Caribbean Basin area to aid their economic development and to diversify and expand their production and exports. The CBERA, enacted in title II of Public Law 98-67, implemented by Presidential Proclamation 5133 of November 30, 1983, and amended by the Customs and Trade Act of 1990, applies to merchandise entered, or withdrawn from warehouse for consumption, on or after January 1, 1984. Indicated by the symbol "E" or "E*" in the special subcolumn, the CBERA provides duty-free entry to eligible articles, and reduced-duty treatment to certain other articles, which are the product of and imported directly from designated countries, as set forth in general note 7 to the HTS.

Free rates of duty in the special subcolumn followed by the symbol "IL" are applicable to products of Israel under the **United States-Israel Free Trade Area Implementation Act** of 1985 (IFTA), as provided in general note 8 to the HTS.

Preferential nonreciprocal duty-free or reduced-duty treatment in the special subcolumn followed by the symbol "J" or "J*" in parentheses is afforded to eligible articles the product of designated beneficiary countries under the **Andean**

Appendix G

Trade Preference Act (ATPA), enacted as title II of Public Law 102-182 and implemented by Presidential Proclamation 6455 of July 2, 1992 (effective July 22, 1992), as set forth in general note 11 to the HTS.

Preferential free rates of duty in the special subcolumn followed by the symbol "CA" are applicable to eligible goods of Canada, and rates followed by the symbol "MX" are applicable to eligible goods of Mexico, under the **North American Free Trade Agreement**, as provided in general note 12 to the HTS and implemented effective January 1, 1994 by Presidential Proclamation 6641 of December 15, 1993. Goods must originate in the NAFTA region under rules set forth in general note 12(t) and meet other requirements of the note and applicable regulations.

Other special tariff treatment applies to particular **products of insular possessions** (general note 3(a)(iv)), **products of the West Bank and Gaza Strip** (general note 3(a)(v)), goods covered by the **Automotive Products Trade Act** (APTA) (general note 5) and the **Agreement on Trade in Civil Aircraft** (ATCA) (general note 6), **articles imported from freely associated states** (general note 10), **pharmaceutical products** (general note 13), and **intermediate chemicals for dyes** (general note 14).

The **General Agreement on Tariffs and Trade 1994** (GATT 1994), pursuant to the Agreement Establishing the World Trade Organization, is based upon the earlier GATT 1947 (61 Stat. (pt. 5) A58; 8 UST (pt. 2) 1786) as the primary multilateral system of disciplines and principles governing international trade. Signatories' obligations under both the 1994 and 1947 agreements focus upon most-favored-nation treatment, the maintenance of scheduled concession rates of duty, and national treatment for imported products; the GATT also provides the legal framework for customs valuation standards, "escape clause" (emergency) actions, antidumping and countervailing duties, dispute settlement, and other measures. The results of the Uruguay Round of multilateral tariff negotiations are set forth by way of separate schedules of concessions for each participating contracting party, with the U.S. schedule designated as Schedule XX. Pursuant to the **Agreement on Textiles and Clothing** (ATC) of the GATT 1994, member countries are phasing out restrictions on imports under the prior "Arrangement Regarding International Trade in Textiles" (known as the **Multifiber Arrangement** (MFA)). Under the MFA, which was a departure from GATT 1947 provisions, importing and exporting countries negotiated bilateral agreements limiting textile and apparel shipments, and importing countries could take unilateral action in the absence or violation of an agreement. Quantitative limits had been established on imported textiles and apparel of cotton, other vegetable fibers, wool, man-made fibers or silk blends in an effort to prevent or limit market disruption in the importing countries. The ATC establishes notification and safeguard procedures, along with other rules concerning the customs treatment of textile and apparel shipments, and calls for the eventual complete integration of this sector into the GATT 1994 over a ten-year period, or by Jan. 1, 2005.
